BRAUNWALD From The Cardiology Branch, National

Heart Institute, Bethesda, Maryland AB STRACT
Although baroreceptor stimulation produced by marked alterations in arterial pressure has been shown to produce reflex changes in venous tone in animals, the effects on venous tone have not been studied in humans. Feb 15th, 2024.

Venous Thromboembolism And Atherothrombosis
The metabolic syndrome has emerged as a potent risk factor for atherothrombosis that affects up to 45% of the US population over 50 years old.⁹ Recent data also implicate the metabolic syndrome as a risk factor for VTE. A registry of 20,374 patients demonstrated that the metabolic syndrome increased the risk of VTE by 84%.¹⁰ However ... Apr 10th, 2024
